MEMORANDUM FOR: CHIEF, STB

SUBJECT: Evasion and Escape Course #1

1. The proposed outline for the evasion and escape course looks very good. I doubt, however, that there will be sufficient students to run this on a course basis. I suggest that you go ahead and publish your schedule as indicated and then if there are not sufficient students to run it as a course, to go ahead and run it on a tutorial basis similar to the manner in which [] espionage course was presented.

2. Considering the fact that the written plans will be submitted on the afternoon of 28 September and are to be critiqued on the following morning, I would suggest that careful consideration be given to the method in which these plans are reviewed and critiqued. As a possible solution, it may be advisable for one student to review the paper of another student and to present a critique to the remainder of the group.

3. The most important point concerning this course is to have it acceptable to all of the foreign division chiefs of OPC. Therefore, it is almost mandatory that it be coordinated with them to ensure that it incorporates all of the techniques which they feel to be applicable to their areas of operations.

CHIEF, TRD
